REGISTRATION FORM FOR ADULTS

Surname, First name

Sex male female

Date of birth

Address (Postal code/City/Street)

email-address Tel.-Nr.

Name/Loc. of alpine club Member card nr.

With my signature, I confirm to have read and understood the user rules of the climbing gym, as well as the rules for bouldering and rope-climbing. I agree that these rules apply when I enter the climbing gym. All the personal information I provide is only needed for the Alpenverein Kletterzentrum Innsbruck GmbH and in case of an accident for the first report to the police.

I agree to receive newsletters via email to the above address.

I have received sufficient professional education to properly and safely use the climbing gym, respectively, I have myself organised sufficient instruction by an expert person and I am fully aware of the fact that me and my climbing partners are using the entire facility at our own risk. The staff of the climbing gym does not check in any way whether or not I have sufficient expertise to use the facility, whether or not I can properly follow safety protocols or whether or not a qualified instructor is present.

I am aware that,

- **in the locker rooms**, no liability is taken, that I have to take care to keep valuables etc. locked up, and that changing clothes is done inside the locker room and not in the gym.
- **I am responsible to watch beginners and minors** that are in the gym with me at all times during my entire stay and that I have the complete responsibility. I guarantee that I have the necessary qualifications and knowledge.
- **the „Kinderparadies“ (kids' paradise)** is equipped with softer mats and that children cannot be left unattended either there or anywhere else in the facility. Little children should always be „spotted“ while bouldering.
- **training in the fitness/weight room requires** knowledge and experience and that adolescents are not allowed to be without an expert coach or companion due to the risks that come with the use of free weights.
- **in bouldering**, injuries are common due to the high risk when falling, the risk has to be managed at my own responsibility and I have to adapt it to my abilities. Children should not boulder higher than ca. 3 m, school children should not boulder higher than 3.5-4 m. The falling zones (any area where a boulder could potentially land in case of a fall) of other climbers must always be avoided. The entire bouldering mat must be kept free of objects (chalk bags, bottles, brushes, etc.). Reserving parts of the wall is not allowed. (cf. climbing user rules)
- **when climbing with a rope**, correct, proper handling of every piece of equipment is mandatory. Due to the high risk when falling, wrong handling of equipment or wrong application of belaying techniques and safety measures can lead to severe physical injuries and health issues for the climber, the belayer, and third party, in extreme cases, deadly injuries. Thus, falling zones of other climbers must be avoided. The utmost concentration, resp. absolutely no distraction must be guaranteed inside the discretion zone of the belayers. Reserving routes and areas of the wall is not allowed (cf climbing user rules).
- **the use of the Toppas climbing tools** (automatic cable belay) comes with its own set of rules, which must be followed. Respect the other users of the facility, keep enough distance to others, do not do any traversing, rope climbers have priority! Particular care is necessary due to the lack of a partner check. Always make sure that you are safely attached! Do not swing on the Speed Toppas!
